

and Report

DESCRIPTION

PRODUCT COVERED:

USR, CNR Candelabra Base Lampholder – Components, Models WLHB8421H and WLHB8421G.

Note: USR – United States Standard, Recognized
CNR – Canadian Standard, Recognized

ELECTRICAL RATINGS:

60 W, 125 V.

TECHNICAL CONSIDERATIONS (NOT FOR FIELD REPRESENTATIVE'S USE):

USR indicates investigation to the United States Standard, UL 496, the Standard for Lampholders.

CNR indicates investigation to the Canadian Standard, CSA C22.2, No. 43, the Standard for Lampholders.

Use – For use only in complete equipment where the acceptability of the combination is determined by Underwriters Laboratories Inc.

Conditions of Acceptability – When installed in the end-use application, consideration shall be given to the following:

1. These components have been judged on the basis of the required spacings in the Standard for Lampholders (UL 496), which would cover the component itself if submitted for unrestricted Listing.
2. These components are intended for factory installation only and also used in dry location.
3. These lampholders are provided with insulation-piercing terminals and has been evaluated for use with No. 18 AWG, Listed, flexible cord, two conductors, SPT-1 cord, rated 105°C, stranded copper conductors.
